

1. 12MHz crystal is driven Bluetooth chip, also provide reference clock for Bluetooth chip and internal frequency-synthesizer.

2. Antenna power source:

No antenna connector for printed antenna. The ground is only that of the print circuit board.

3. BT Module: BluePacket BP20372 is a high performance Bluetooth module for embedded system based on Broadcom BCM2037 wireless audio processor. It is integrated with Flash, Crystal, Link control and CPU, BP20372 supports the Bluetooth 2.0 specification with enhanced data rate (EDR) and backward compatibility to BT1.2 and BT1.1.

4. Electric current is supplied by Lithium-Ion Polymer Rechargeable Battery---3.7V 380mAh.
